

New York

New York General Comments

- Transforming Reserve Component facilities is the key to enable Reserve forces to better meet current and future operational requirements. Ft Hamilton is an ideal location to support this transformation.
- Transforms Watervliet arsenal into a Joint Manufacturing & Technology center of excellence that supports critical armament skills and creates a technologically oriented business park with the local community.
- Co-location of the Academy prep school at West Point gains efficiencies in training development and provides daily incentive for Prep students working to gain admission to one of the most prestigious institutions in the United States.
- Closing RC facilities is offset by the construction of modern AFRCs that will be the right size and design to support units that will be stationed there. Transforming Reserve Component facilities in the State of New York will improve training, readiness and quality of life for more than 2390 Reserve Component soldiers, full-time unit support personnel, and their families.

Fort Hamilton

BRAC 2005 Recommendation:

The Army intends to make Ft Hamilton a hub for Reserve Command and Control in the North East while maintaining its Active-Component installation status. The Army Reserve Command and Control transformation will enhance unit readiness, increase training opportunities, generate operational efficiencies and convert non-deployable commands into deployable force structure.
